2 Live Power BI Reports

- 2.1 Seamless (Pipe/Tube/BA) Production Details Report
- 2.2 Welded/L-Saw/Condenser Production Details Report
- 2.3 Job Cardwise_Production_Details Report

3 Automation Dashboards

- 3.1 Machine Capacity vs Actual Production
- 3.2 Scrap MIS Dashboard
- 3.3 Job Cardwise Production Scrap Report
- 3.4 Manpower Cost Report

1 Introduction

1.1 Purpose

This document is the single reference for the Management Information System (MIS) reports used for production, scrap and manpower cost monitoring. For each report it gives the access link, a preview of the dashboard and, where the dashboard is generated from an exported file, the exact steps to produce it.

The reports fall into two categories: live Power BI reports, which are always up to date and can be opened directly, and automation dashboards, which are generated by exporting data from the ERP Report Engine and uploading it into a generator file.

1.2 Report Summary

#	Report	Type	How to Use
1	Seamless (Pipe_Tube_BA) Production Details Report	Live – Power BI	Open the link
2	Welded_Lsaw_Condenser Production Details Report	Live – Power BI	Open the link
3	Job Cardwise Production Report	Live – Power BI	Open the link
4	Machine Capacity vs Actual Production	Automation	Export CSV, upload to generator
5	Scrap MIS Dashboard	Automation	Export 4 CSVs, upload to generator
6	Job Cardwise Production Scrap Report	Automation	Export CSV, upload to generator
7	Manpower Cost Report	Automation	Upload salary input sheet

2 Live Power BI Reports

These reports are published in Power BI and refresh automatically. Open the link to view the latest production figures.

2.1 Seamless (Pipe_Tube_BA) Production Details Report

Report Name	Seamless (Pipe/Tube/BA) Production Details Report-Live
Type	Live – Power BI
Access Link	Open in Power BI

3 Automation Dashboards

These dashboards are generated on demand. Data is exported from the Report Engine Configuration in the ERP and uploaded into the corresponding generator file, which builds the dashboard instantly.

3.1 Machine Capacity vs Actual Production

Report Name	Machine Capacity vs Actual Production- Automation
Type	Automation
Generator	Machine Capacity vs Actual Production Generator.html

Steps:

1. Open ERP & Go to this Module **06.410.03 - Production Engine (Process Wise)**.
2. Find R955 Machine Capacity Vs Production PBI (Right Side).
3. Click on Machine Capacity vs Actual Production and export it as CSV or Excel.
4. Open the [Machine Capacity vs Actual Production Generator.html](#)
5. Upload the CSV file into it. Your dashboard is ready.

Figure 4: Scrap MIS Dashboard

Steps:

1. Open ERP & Go to **06.400.00 - Special Engines - Production Planning** and untick Dashboard Engine.
2. Click on Production Summary & Find **R959 Production Summary Report-Welded**.
3. Select the period, export as CSV and name the file '**Welded**'.
4. Find **R960 Production Summary Report-Seamless** in same Engine.
5. Select the period, export as CSV and name the file '**Seamless**'.
6. Go to **Slitting Plan Report** on same Path **06.400.00 - Special Engines - Production Planning**.
7. Find **R961 Slitting Production Summary Report**.
8. Select the period, export as CSV and name the file '**Slitting**'.
9. Now, go to **06.410.03 - Production Engine (Process Wise)** module & open it.
10. Find **R950 Final Cutting Scrap Report-PBI** on Right Side.
11. Select the period, export as CSV and name the file '**Final_Cutting**'.
12. Open the [Scrap MIS Dashboard Generator.html](#) file and upload '**Welded**', '**Seamless**', '**Slitting**' and '**Final_Cutting**'. Your dashboard is ready.

3.3 Job Cardwise Production Scrap Report

Report Name	Job Cardwise Production Scrap Report-Automation
Type	Automation
Generator	Job Cardwise Production Scrap Report Generator

Figure 5: Job Cardwise Production Scrap Report, dashboard (1 of 2)

Figure 6: Job Cardwise Production Scrap Report, dashboard (2 of 2)

Steps:

1. Open ERP & go to **06.410.03 - Production Engine (Process Wise)**.
2. Find **R957 Job Cardwise Scrap MIS-PBI**.
3. Select the period and export the report as CSV.
4. Upload the CSV into the [Job Cardwise Production Scrap Report Generator](#). Your dashboard is ready.

3.4 Manpower Cost Report

Report Name	Manpower Cost Report-Automation
Type	Automation
Generator	Manpower Cost Processing System

Manpower Cost Processing System
Accounts & Payroll — Department-wise Salary Cost Automation

Period: JUL - Source: 1. Salary Working Input - final.xlsx

1 - UPLOAD SALARY INPUT

Click to choose or drag the Accounts Salary Input Excel here
Expected sheets: Salary Working, Apprentice Working, Contractor, Canteen (xlsx)

Report Period (shown on outputs, e.g. "July 2026")
JUL

Process Salary Data Reset

Processed 1065 salary + 110 apprentice records into 36 department file(s) (including 22 dynamic / unmatched).

1. Salary Working Input - final.xlsx ✓ loaded

1,175 EMPLOYEES PROCESSED

36 DEPARTMENT FILES GENERATED

₹4,34,38,212 TOTAL EARNED CTC

₹28,18,079 TOTAL OVERTIME

₹5,55,49,571 GRAND TOTAL COST

Dynamic departments created — these Plant Names (Column N) / cost labels did not match any predefined department, so a separate file was created for each so that no cost is lost. Review and re-map if needed.

- CIVIL** — DYNAMIC — No predefined department mapping found for "CIVIL" (Column K). Created automatically so no cost is lost. Review and map this department if needed. Source: Salary Working
- Operations** — DYNAMIC — No predefined department mapping found for "Operations" (Column K). Created automatically so no cost is lost. Review and map this department if needed. Source: Salary Working
- SALES & MARKETING** — DYNAMIC — No predefined department mapping found for "SALES & MARKETING" (Column K). Created automatically so no cost is lost. Review and map this department if needed. Source: Salary Working
- Domestic Invoicing** — DYNAMIC — No predefined department mapping found for "Domestic Invoicing" (Column K). Created automatically so no cost is lost. Review and map this department if needed. Source: Salary Working

Figure 7: Manpower Cost Processing System

Steps:

1. Click on the link above to open the generator.
2. Upload your **Salary Input** sheet. Name the file **Salary Input** and keep only the columns shown in the reference sheet.
3. Your dashboard is ready. You can download the output as Excel or PDF.
